Summary

Associate DevOps Engineer with 2+ years of experience working with AWS cloud infrastructure, Terraform, CI/CD, Jenkins, Docker, Linux, Git, and monitoring tools. Experienced in provisioning cloud infrastructure through Infrastructure as Code (IaC), automating build and deployment workflows, containerizing applications, and configuring AWS networking and compute services. Hands-on experience with AWS EC2, VPC, IAM, ALB, Auto Scaling, RDS, ECR, EKS, ECS, S3, CloudFront, and CloudWatch, along with Prometheus, Grafana, and Alertmanager for infrastructure monitoring and observability. B.Tech graduate in Cloud Technology & Information Security.

Technical Skills

- **Cloud:** AWS, Microsoft Azure
- **AWS Services:** EC2, VPC, IAM, S3, ALB, Auto Scaling, RDS, ECR, EKS, ECS, CloudFront, CloudWatch, Route 53
- **Infrastructure as Code:** Terraform, AWS CloudFormation
- **CI/CD:** Jenkins, GitHub Actions, CI/CD Pipelines
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes, Amazon EKS, Amazon ECR
- **Monitoring & Observability:** Prometheus, Grafana, Alertmanager, Node Exporter, AWS CloudWatch
- **Operating Systems:** Linux (Ubuntu), Windows, WSL
- **Programming & Scripting:** Bash, Python, Java
- **Version Control:** Git, GitHub

Professional Experience

TechnoPath - Pune, India
Jul 2025 – Present

Associate DevOps Engineer
AWS, Terraform, Jenkins, Docker, Linux, Git, Prometheus, Grafana

- Provision AWS cloud infrastructure using Terraform, following Infrastructure as Code (IaC) practices for consistent and repeatable deployments.
- Build and maintain CI/CD pipelines with Jenkins and GitHub Actions to automate application build, testing, and deployment workflows.
- Containerize applications with Docker and Docker Compose to maintain consistent environments across development, testing, and production.
- Set up infrastructure monitoring and alerting with Prometheus, Grafana, and Alertmanager to monitor system health and resource utilization.
- Troubleshoot Linux and cloud infrastructure issues using system monitoring, log analysis, resource utilization metrics, and service-level diagnostics.

TechnoPath - Pune, India
Jul 2024 – Jun 2025

DevOps Intern
AWS, Terraform, Jenkins, Docker, Linux, Git, Bash

- Provisioned AWS infrastructure for development and testing environments using Terraform and Infrastructure as Code (IaC) practices.
- Supported Jenkins CI/CD pipelines that automated application build, testing, and deployment processes.
- Administered Linux servers, managed source code with Git and GitHub, and supported application deployment automation.
- Used Bash and Linux command-line utilities to support infrastructure administration and deployment activities.

Projects

AWS 3-Tier Infrastructure Architecture *AWS, Terraform, EC2, VPC, ALB, Auto Scaling, RDS*

- Designed and provisioned a secure 3-tier AWS infrastructure using Terraform and Infrastructure as Code (IaC).
- Created a custom VPC with public and private subnets, Internet Gateway, NAT Gateway, route tables, Security Groups, and IAM policies.
- Deployed EC2 instances behind an Application Load Balancer with Auto Scaling to support highly available application delivery.
- Configured Amazon RDS in private subnets for secure database connectivity.
- Developed reusable Terraform modules and managed infrastructure through Git for consistent and repeatable deployments.

CI/CD Pipeline Automation *Jenkins, Docker, GitHub, Terraform, AWS*

- Built an automated Jenkins CI/CD pipeline covering source-code checkout, application testing, Docker image creation, and deployment.
- Integrated GitHub repositories with Jenkins for automated pipeline execution and version-controlled application delivery.
- Used Docker to containerize applications and Terraform to provision the AWS infrastructure required for deployment.
- Reduced manual deployment steps by automating application build and deployment workflows.

Cloud Monitoring & Observability Platform *Prometheus, Grafana, Alertmanager, AWS, Linux*

- Set up infrastructure monitoring using Prometheus, Grafana, and Alertmanager for Linux servers and AWS EC2 instances.
- Created Grafana dashboards to monitor CPU, memory, disk, network, and application metrics.
- Configured Prometheus alerting rules and Alertmanager notifications for resource utilization, service availability, and infrastructure health.
- Troubleshot Linux performance issues using resource monitoring, log analysis, service checks, and system-level diagnostics.

Education

Ajeenkya D Y Patil University
Pune, Maharashtra, India

B.Tech (Cloud Technology & Information Security) – CGPA: 9.08 *Aug 2021 – May 2025*

Achievements

- Secured **2nd Rank** in B.Tech - Cloud Technology & Information Security among the graduating batch at Ajeenkya D Y Patil University, Pune.

Certifications

- **AWS Cloud Fundamentals** – Coursera
  - Gained understanding of AWS services, cloud computing concepts, security, pricing, and deployment models.
- **Linux Command Line Basics** – Infosys
  - Practiced Linux file management, permissions, process management, networking, and shell commands.
